

THE DUSK NETWORK

A NEW DAWN FOR DECENTRALIZED PRIVACY

ROADMAP

2017 / Q3

FEASIBILITY

- Research Seeding
- SBA* Outline
- Nomenclature of Secure Tunnel Switching

2018 / Q3

INCEPTION

- Dusk Non-Profit Foundation
- Private Fundraising
- Dusk EU Consortium Kickstart

2018 / Q4

INFRASTRUCTURE

- Devnet
- Voucher Seeder & Entry Tunnel
- Provisioner
- Wallet

2019 / Q1

CORE

- SBA*
- Anonymous Gossip Network
- XST-20 Confidential Security Token Standard
- Testnet

2019 / Q2

ROLLOUT

- P2P State Channel Engine
- Secure Tunnel Switching
- Mainnet

2019 / Q3

CONFIDENTIAL NETWORK

- Zero-KYC Security Token
- Decentralized Private MPLS
- XST-20 Confidential Security Token Standard

Find detailed roadmap at dusk.network

A **CONFIDENTIALITY-DRIVEN** INFRASTRUCTURE SOLVING BLOCKCHAIN'S UNANSWERED CHALLENGES: **SCALABILITY, PRIVACY AND COMPLIANCE.**

FOLLOW OUR CHANNELS
TO STAY UP TO DATE ON NEWS!

FROM MISSED CHANCE...

- ! STO "solutions" ignore privacy requirements, and build on fully open ledgers.
- ! These propositions are centralized, and resort to off-chain middlemen.
- ! This prevents scalability, and secondary market adoption.
- ! STO platforms and incubators charge too much, and offer too little.

... TO OPPORTUNITY

- ✓ The first protocol that satisfies the entire **STO regulatory framework on-chain**, at a fraction of the cost.
- ✓ **Decentralized, automated**, and extremely **convenient** for any size organization.
- ✓ **Scalable**. Dusk's tech allows it to be the basis for a real secondary market, including DEX.
- ✓ **Confidential & compliant**. Privacy is a spectrum, not binary, and Dusk features flexibility for both regulatory and user requirements.

TECHNOLOGY

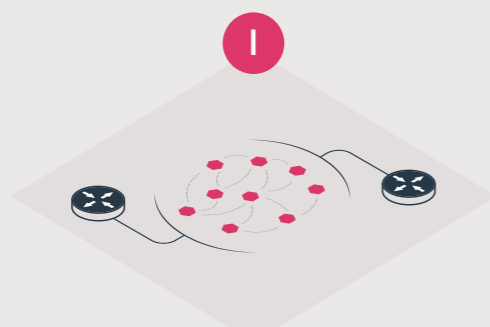

Laser focus on providing flexible confidentiality for the three use cases that will make Dusk Network a true ecosystem:

- ★ Unidirectional atomic transfer of value (payments)
- ★ Bidirectional atomic exchange of value (asset ownership, security tokens)
- ★ Time unbound exchange of value (data streaming, audio, video, comms, etc.)

BUSINESS

Dusk Foundation coordinates an EU-focused consortium bringing together businesses, regulators, and financial institutions to create a viable security token market.

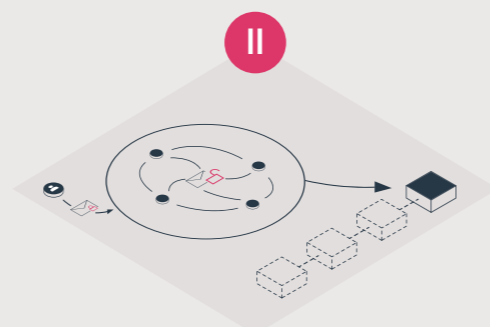

- ★ First class for Dusk's STO Incubator is committed
- ★ Consortium is active on EU level in the policy and grant space
- ★ strong ties with payment processors, funds exchanges, and telcos

ANONYMOUS NETWORK LAYER

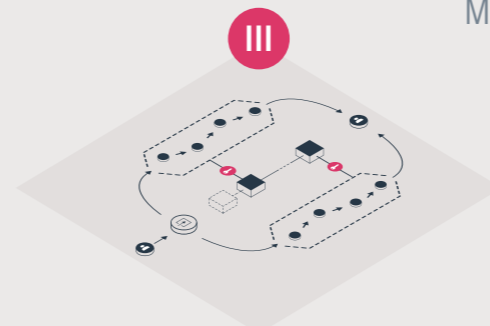

A protocol allowing cryptocurrency payments for time-unbound and fast data transmission.

Find detailed *whitepaper* at dusk.network

SEGREGATED BYZANTINE AGREEMENT

A novel privacy-oriented consensus algorithm vastly more efficient than PoW or PoS.

SECURE TUNNEL SWITCHING

A gossip-oriented communication tier inspired by I2P.

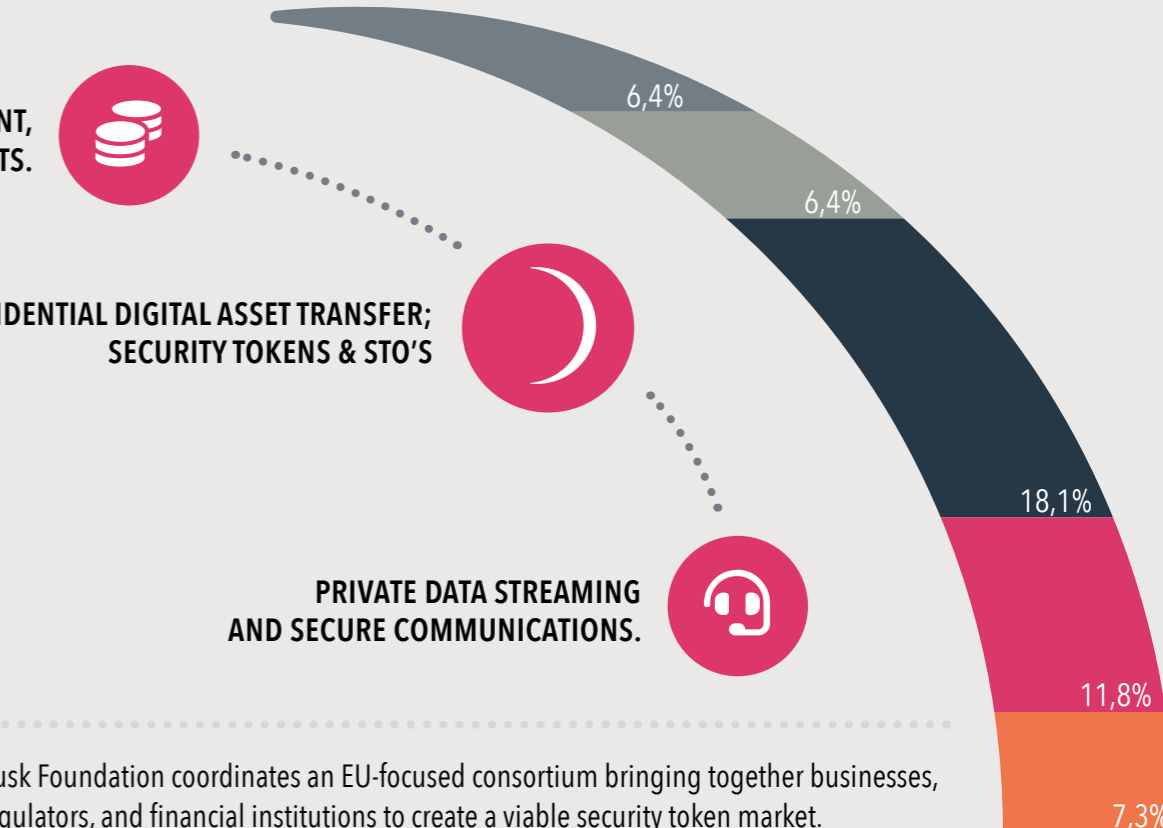

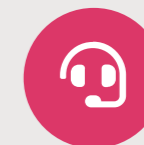

SECURE, COMPLIANT, CONFIDENTIAL PAYMENTS.

CONFIDENTIAL DIGITAL ASSET TRANSFER; SECURITY TOKENS & STO'S

PRIVATE DATA STREAMING AND SECURE COMMUNICATIONS.

Total Token Distribution

- Token Sale
- Marketing, PR, Conferences, Ambassador Programme, Airdrop
- Exchange Budget & Partner Ecosystem Development
- Development Fund
- Team
- Advisors

\$ 14.4 M USD
for 50% of Tokens

"Regulator friendly Monero"
(BlockVenture Coalition)

"[Dusk Network is] the sweet-spot between privacy and transparency in payment, communication and asset ownership transfers."
(VentureBeat)

"Other blockchain platforms treat privacy as an all-or-nothing"
(Forbes)
